Accessing MyVPN with an On-Demand Tokencode

MyVPN can be used on a QLD Health Device to access network drives and apps whilst offsite.

Checkpoint Endpoint Security Client must be installed on your Queensland Health laptop. You will also need to have registered for an RSA pin.
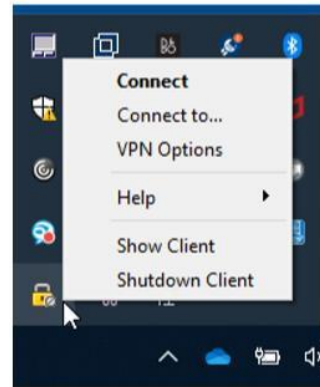

1. Enter into the following fields **Username:** Novell ID **Tokencode:** Your RSA Pin

2. A new **tokencode** will be sent via SMS, enter the code into the **Respone** field

3. Wait for the connect to succeed and the dialog box to disappear
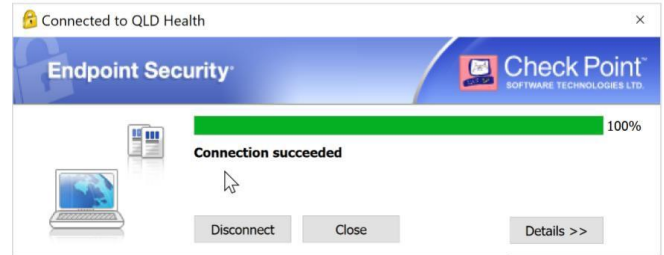

4. **Checkpoint Endpoint Security Client** is available in the system tray as a yellow padlock

5. You have now successfully signed into MyVPN from your device
